About This Game

DESCRIPTION

Have you ever invented your own worlds? Perhaps you managed to think out one of them so well that you literally immersed in it? Sometimes, when the soul is badly bad, you just want to take it and find yourself in a fantasy world where everything is fine, but there are no problems. But ... But suppose that in this world, you have terrible consequences for him, carrying a part of your problems into your own fragile world.

And now, now your world is bursting at the seams because of you, and you are simply stuck in it. The game is a three-dimensional platformer-puzzle with elements of horror and parkour. The visual part of the game is made in the style of geometric surrealism.

Title: EXIST

not the best game BUT really fun too play. Don't bother, it doesn't work.. old game but still interesting - :. This game is nothing like Battle City - the game it's supposedly based on. This is just a generic tank shooter. It doesn't even have the power ups from the original or the fun level designs. Instead you get to upgrade your tank stats by 1 after every fight, amazing.

Also I have a feeling these other reviews which are praising it are made by the developers or their friends, they don't seem genuine or don't make much sense because this game is absolutely nothing like the original, Battle City

Do not waste your money on this if you think this is like Battle City. A childhood memory brought back. Loving it.. This game is pretty great for when you only have a few minutes to play. It's kind of challenging and the weapons are all pretty neat.. i'm not really good at this game, but i like it. mostly because of woof's art, but still.. I am recommending this game because I did enjoy playing it. Was it my favorite game ever? No but I still had fun. If you like hogs then it works well and has good graphics. The story is pretty good, too. Now if you are impatient and poor this is not the game for you. If you can afford to spend the money then you will be able to get all the achievements faster than I did (58 hours) but I did accomplish that feat without spending any thing more than the .49 USD I paid when it was on sale. Now it was originally a free to play game so it does have an energy bar but I got plenty of energizers to replenish that energy bar while playing so that was good. Does it have a lot of grind? Of course, that is the nature of the beast but if you are patient and don't mind sometimes having to wait for the energy bar to replenish (or have money to spend) then this could be a fun game for you, too. Just don't pay full price.. I didn't even know they were making a sequel to the original Insult Simulator, so I was pleasantly surprised to see this pop up in the suggestions. After taking it for a drive, I expect I'll be spending many hours on this one, just as in the original. There are some improvements in the game, sometimes allowing for even more constructive sentences, which have a tendency to make more sense overall and can allow you to be a bit more creative.

Also, I'd like to add there are some minor flaws which I expect will be cleaned up as time goes by (the game has only been out a few days). This mainly includes phrases spoken which don't match up at all with the words you chose. Though this has little to no impact on the gameplay, it is minorly distracting.

Overall, I recommend this game if you played the first, but do keep in mind this one has a different feel to it, especially as the overall theme revolves around acting/Hollywood/etc.

Also, as a sidenote to the developer, if you're reading this: Could you PLEASE :) lower the volume of the intro credit scenes? I'm talking about the first two momentary screens that load, when the game first loads. The sound effects/music are extremely loud (RIP headphone users). I've adjusted the volume in settings for the gameplay itself, but it has no effect on the game intro music (perhaps a bug?). I love the game, but always dread that 150 decibel flute that starts playing. It's a cute/creative intro, I wouldn't change it, except for the music level.. pretty good game

Fun game. Controls take a few minutes to get used to, but very good tutorial to start the game.

Really good VR experience. Showcases the possibilities and fun to climb around a city throwing cars and destroying buildings. 4.5 out of 5 stars.. So good...the visuals are charming, and considering how many levels there are, which there are a lot of them, it's amazing that the dev. was able to keep the gameplay and level design and layout so fresh. Each level seems unique and there are new mechanics explored every few levels. It's certainly addictive yet deserving of your time and attention. There is no doubt that the developer put his heart and time into this project and it shows. Please buy it if you like platformers, you won't be disappointed!. Republican-wet-dream sport. What's not to love?

But for real this game is addictive. I bought it and immediately put 2 hours into it. Would love to see some more guns/courses initially, though. But it's still a blast (pun intended).. So far this is the only game that I thought was worth buying in 2017. Clearly still a work in progress but I am having the best time ever playing this. This is what video games are all about. I'm waiting for the Flatfoot in Africa DLC!!. cool sa sauvegarde meme pas c'est trop bien :(. ITs either im to bad @ the game , or the game is to hard for me ... Either way i cant even beat level 3 on easy :x
